Chapter 1: Introduction to eHMP

About eHMP

The Enterprise Health Management Platform (eHMP) project is a multi-year effort to evolve a modern, service-oriented platform which provides a web-based user interface, clinical data services, and assembles patient clinical data from federated Veterans Health Information Systems and Technology (VistA) repositories and Department of Defense (DoD) data sources, reflective of each location providing care to the patient. This federated data is aggregated into an Enterprise Virtual Patient Record (eVPR). eHMP service components will span all application layers, including presentation, business and core services, and data access.

eHMP version 1.2 will deliver critical viewer edition enhancements, which will provide new capabilities to the Department of Veterans Affairs (VA), beyond what is currently available via Computerized Patient Record System (CPRS), Joint Legacy Viewer (JLV), and VistAWeb. The system provides enhanced presentations of clinical data, ranging from trend views that provide a quick snapshot of easily understandable data, to fully detailed views that give users a complete range of options to examine a patient's longitudinal medical record. Users will be able to configure the views into a limitless number of custom workspaces, to support a variety of clinical workflows.

There will be a variety of pre-configured workspaces available to users, which are filtered for specific conditions. Workspaces will provide appropriate and focused clinical information for a selected condition (COPD, Diabetes, etc.). Further enhancements will include improved text search and online application help screens. A significant step toward reaching interoperability goals is the incorporation of discrete, clinical information received from community health partners via C32 (Continuity of Care Document (CCD), which focuses on patient summary information) and Consolidated-Clinical Document Architecture (C-CDA) documents. The narrative portions of these documents are available in eHMP.

System Requirements

eHMP User Interface (UI)

eHMP is a web-based application, and is designed to run in a web browser. eHMP release v1.2 is optimized for use with Internet Explorer 11 (IE 11).

eHMP Help

Online Help Feature

There are online help icons  throughout the eHMP application. The online help feature provides detailed information about specific system topics. Users can click an **icon** to open context-specific help in a separate window.

National Service Desk (NSD)

The NSD is available to report any issues while using eHMP. Contact information for the NSD will be available once onboarding is completed.

eHMP Help Resources

The VA eHMP SharePoint site¹ provides resources for more reference information on the eHMP application. Some of the available resources include: frequently asked questions (FAQs), quick reference guides, and system demonstrations.

In addition, the VA Software Document Library² (VDL) will house a variety of eHMP documents.

The Organization of this User Guide

This User Guide is organized to mimic the use of the application, beginning with how to log in to eHMP, and progresses by giving instructions for each of the features available within the application.

¹ <http://go.va.gov/k9ze>

² <http://www.va.gov/vdl/>

Chapter 2: Getting Started

eHMP can be accessed in two ways: through Internet Explorer 11 (IE11), or through the CPRS. The steps for accessing eHMP are described below.

Logging into eHMP via IE 11

Open IE11. Enter the eHMP v1.2 IOC Pre-Production/Test web address³ into the address field, and the login screen displays.

Note: Once your Production environment is installed at your site, you will need to enter the eHMP v1.2 Production web address⁴ into the address field.

The login screen shown in Figure 2-1 is comprised of disclosure and warning language, with application information on the left side of the window, and credential entry fields on the right side of the window.

Figure 2-1 eHMP Login Screen

1. Select a facility from the **Select a facility...** dropdown menu.
2. Enter the VistA access code into the **Access Code** field, and then press the **Tab** key to advance to the following field.
3. Enter the VistA verify code into the **Verify Code** field.
4. Click the **Sign In** button to display the Patient Selection screen.

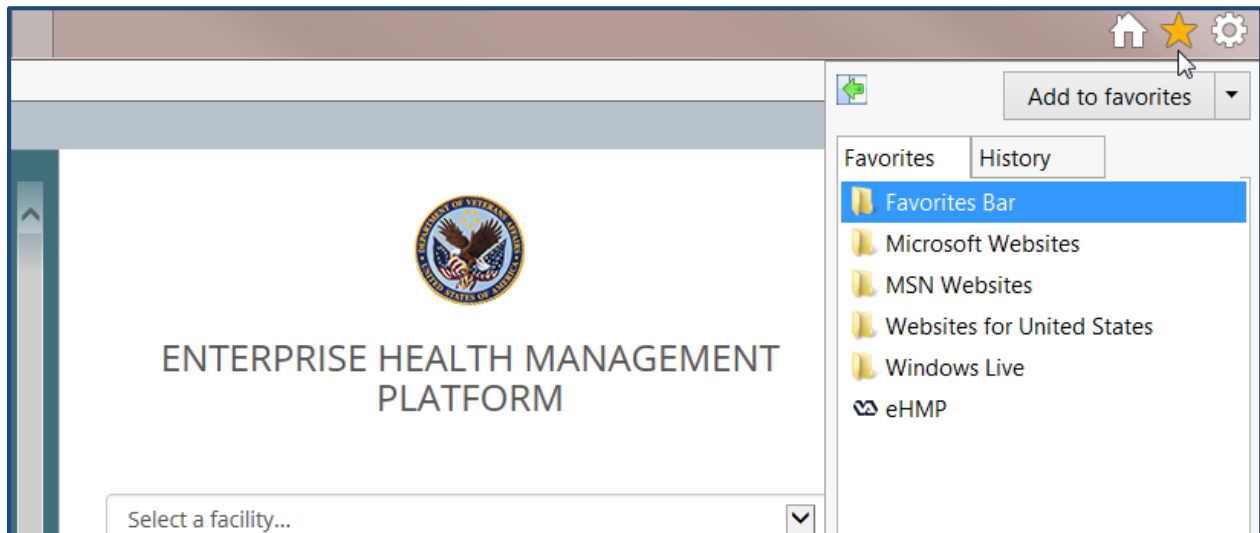

³ <https://ppd.ehmp.va.gov>

⁴ <https://ehmp.va.gov>

Adding eHMP to Favorites in IE11

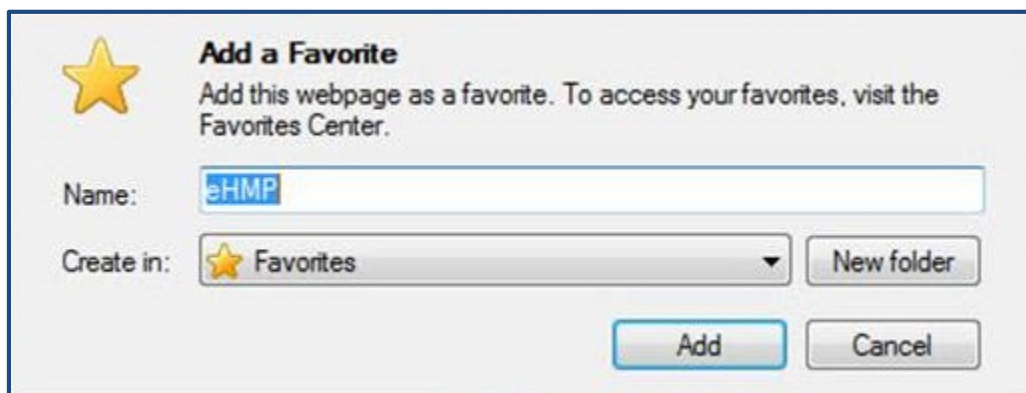

1. Access eHMP.
2. Click the star icon (Figure 2-2) in the upper right corner of the application window.

Figure 2-2 Star Icon

3. Click **Add to Favorites**. The **Add a Favorite** dialog (Figure 2-3) pops up.

Figure 2-3 Add a Favorite

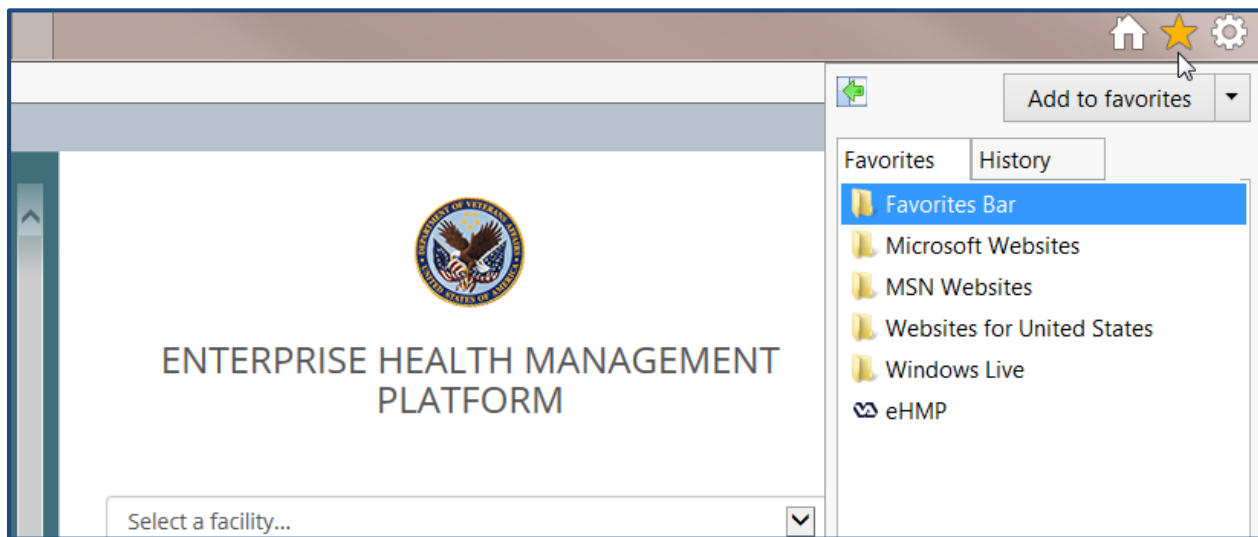

4. Click **Add**

Accessing eHMP using IE11 Favorites

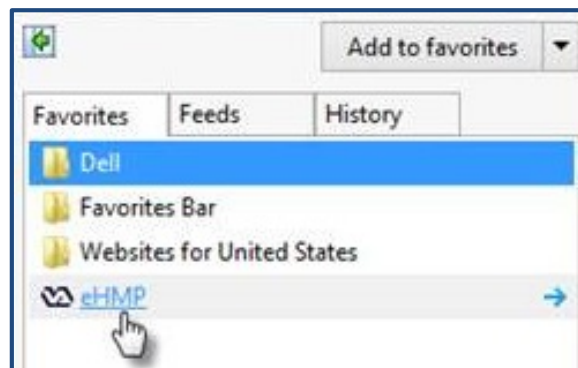

1. Open IE11.
2. Click the star icon (Figure 2-4) in the upper right corner of the application window.

Figure 2-4 Star Icon

3. Click the eHMP link (Figure 2-5).

Figure 2-5 Clicking the eHMP Link

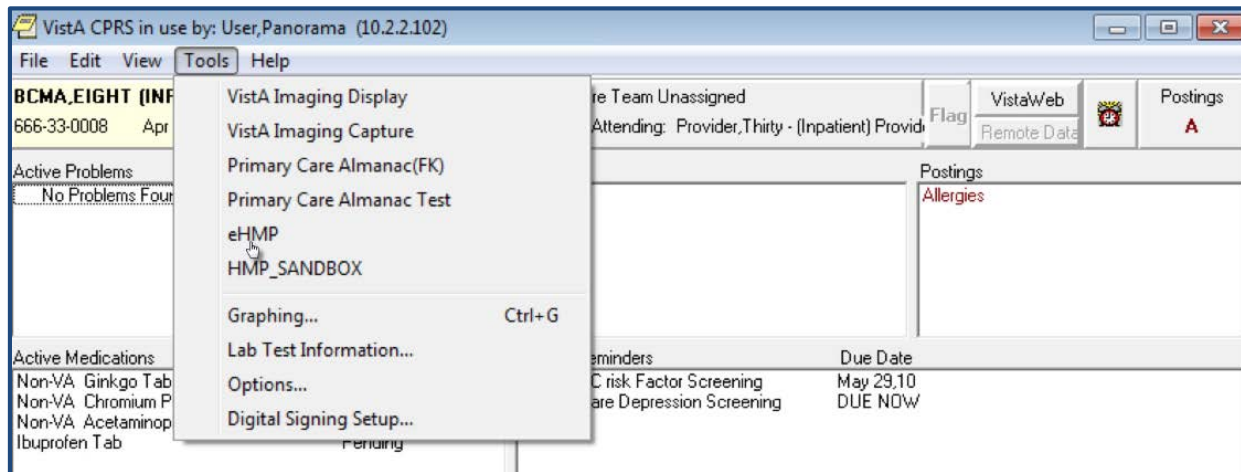

4. The eHMP application displays in the browser window.

Accessing eHMP through CPRS

1. Access CPRS as usual.
2. Select **eHMP** from the CPRS Tools dropdown menu (Figure 2-6).

Figure 2-6 eHMP Link on the CPRS Tools Menu

3. The eHMP application opens.

Note: If the user has accessed a patient's record in CPRS prior to logging into eHMP, that same patient's record will be the default patient view the user will see when they are automatically logged into eHMP. Likewise, if the user accesses a particular patient in eHMP, that patient's record will be the default view presented when the user switches back to CPRS.

Logging Out of eHMP

There are two ways to log out of eHMP: signing out manually, or being automatically logged out due to inactivity.

Manual Sign Out

1. Click the **user name** on the header in the upper right corner, and a dropdown displays.
2. Click **Sign Out** (Figure 2-7) to log out of eHMP.

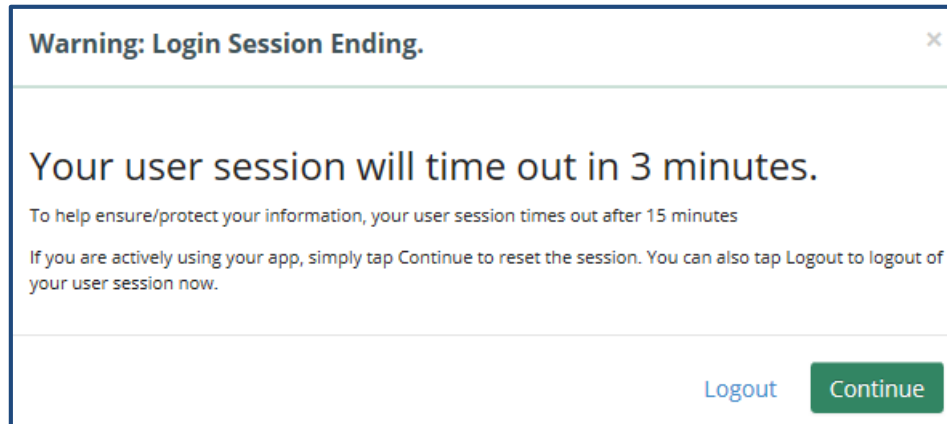

Figure 2-7 Sign Out Button on Header Dropdown

Auto Sign Out

When a user has been inactive for 12 minutes, a warning message informing them their session will end in 3 minutes (Figure 2-8) will appear. The user is given the option to stay logged in by clicking the **Continue** button, or to log out of the application by clicking the **Logout** button.

Figure 2-8 Auto Sign Out Warning Message

When a user has been inactive in the eHMP application for 15 minutes or more, they will be automatically signed out of the application, and a warning message (Figure 2-9) will appear.

Figure 2-9 Inactivity Logout Message

Chapter 3: Patient Search and Selection

About Patient Search and Selection

If the user accessed eHMP through IE11, the Patient Selection screen displays (Figure 3-1), where they have the option to search for a patient.

Figure 3-1 Patient Selection Screen

Patient Search

In order to access patient information and the detailed views of the eHMP application, the user must conduct a patient search.

There are a couple of methods for conducting a patient search in eHMP:

- My Site search
- Nationwide search

My Site Search

The **My Site** search allows the user to search for a patient from several perspectives, including a comprehensive list of all patients, from their defined default patient selection list in CPRS, patients from a specific clinic, or patients in a specific ward at their local VA facility.

My CPRS List

If a user has defined a default patient selection list in CPRS, that same list of patients will be presented in eHMP. A patient may be selected from this list by clicking their **name**.

Clinics

To search for a patient using the **My Site/Clinics** method:

1. Click the **My Site** button.

2. Click the **Clinics** button. A list of clinics at the local VA facility displays.
3. Filter the list of results by entering the name of the clinic in the **Filter clinics** field. The results populate as you type.
4. Select the name of the clinic from the list. The list of patients from that clinic are displayed (Figure 3-2).

Figure 3-2 My Site/Clinics

The screenshot shows the 'My Site/Clinics' interface. On the left, there is a sidebar with tabs for 'My CPRS List', 'Clinics', and 'Wards'. The 'Clinics' tab is active. Below the tabs, there is a search bar labeled 'Filter clinics'. Below the search bar, there are buttons for timeframes: 'Last 30d', 'Last 7d', 'Yesterday', 'Today', 'Tomorrow', and 'Next 7d'. Below these buttons, there is a date range selector with two calendar icons and an 'Apply' button. A list of clinics is displayed below the date range selector, with 'General Medicine' selected and highlighted in dark blue. The main area on the right shows a table with columns: 'Patient Name', 'SSN', 'Date/Time', 'DOB', and 'Gender'. The table currently displays 'No results found.'.

5. Use the timeframe buttons to filter through the list of patients at the selected clinic.
6. Select a patient's name to display the Patient Detail Dialog.

Wards

To search for a patient (within a specific ward) using the **My Site/Wards** method:

1. Click the **My Site** button.
2. Click the **Wards** button. The list of wards at the local VA facility are displayed.
3. Filter the list of results by entering the name of the ward in the Filter wards field.
4. Select the name of the ward from the list. The list of patients in that ward are displayed (Figure 3-3).

Figure 3-3 My Site/Wards

Patient Name	SSN	Date of Birth	Gender	Room-Bed
EIGHT,PATIENT	***.-.-.0008	04/07/1935 (80y)	Male	722-B
EIGHTEEN,INPATIENT	***.-.-.0818	03/09/1945 (70y)	Male	730-B
ELEVEN,INPATIENT	***.-.-.0811	03/09/1945 (70y)	Male	727-A
FIFTEEN,INPATIENT	***.-.-.0815	03/09/1945 (70y)	Male	729-A
FIFTY,OUTPATIENT	***.-.-.0650	03/09/1945 (70y)	Male	735-A
FIVE,INPATIENT	***.-.-.0805	03/09/1945 (70y)	Male	724-C
FOUR,INPATIENT	***.-.-.0804	03/09/1945 (70y)	Male	724-B
FOURTEEN,INPATIENT	***.-.-.0814	03/09/1945 (70y)	Male	728-B
NINE,INPATIENT	***.-.-.0809	03/09/1945 (70y)	Male	726-C
NINETEEN,INPATIENT	***.-.-.0819	06/01/1995 (20y)	Female	731-A
ONE,INPATIENT ONE	***.-.-.0801	03/09/1945 (70y)	Male	722-A
SEVEN,INPATIENT	***.-.-.0807	03/09/1945 (70y)	Male	726-A

5. Select a patient's name to display the Patient Detail Dialog.

Nationwide Search

The **Nationwide** search feature is used to run a patient search across the enterprise, including all VistA systems, as well as external systems, such as DoD and the Nationwide Health Information Network (NwHIN). This search allows the user to enter the following patient attributes: last name (required), first name, date of birth (DOB), and social security number (SSN).

To run a **Nationwide Patient** search:

1. Click the **Nationwide** button (Figure 3-4).

Figure 3-4 Nationwide Search

2. Enter the patient's last name in the **Last Name (required)** field.
3. Enter the appropriate information of at least one other field (First Name, DOB, or SSN).
4. Click the **Search** button. The search results display below the search bar.

Note: Depending on the search results, the request may result in no patient found, 1 to 10 matching results found, or more than 10 records found, which returns a notification message in place of the records (Figure 3-5).

Figure 3-5 Too Many Results Have Returned

Patient Name	SSN	Date of Birth	Gender
Too many results have returned. Please be more specific in your search criteria.			

Selecting a Patient

Once the correct patient has been found, select that patient's name from the search results list. If a patient record is not restricted, their record will be viewable after confirming the selection (as demonstrated in the Accessing an Unrestricted Patient Record section) of that patient.

If a patient record is restricted, a warning will appear prior to accessing the record, requiring acknowledgement of the restricted nature of the record before accessing it (as demonstrated in the Accessing a Restricted Patient Record section).

Accessing an Unrestricted Patient Record

To access an **unrestricted patient** record:

1. Click the **name of the patient** from the search results list.
2. The Patient Detail Dialog appears (Figure 3-6).

Figure 3-6 Patient Detail Dialog

Twentythree, Patient ?

DOB: 04/07/1935

Age: 80y

Gender: Male

SSN: 666-00-0023

CONFIRM SELECTION

3. Click the **CONFIRM SELECTION** button.
4. The patient's record displays in the Main Application Window.

Accessing a Restricted Patient Record

To access a **restricted patient** record:

1. Click the **name of the patient** from the search results list.

Note: The word SENSITIVE displays instead of the patient's SSN and DOB.

2. The Restricted Record Dialog appears (Figure 3-7).

Figure 3-7 Restricted Record Acknowledgement

Zzzretfiveeightyfive, Patient ?

RESTRICTED RECORD

This record is protected by the Privacy Act of 1974 and the Health Insurance Portability and Accountability Act of 1996. If you elect to proceed, you will be required to prove you have a need to know. Accessing this patient is tracked, and your station Security Officer will contact you for your justification.

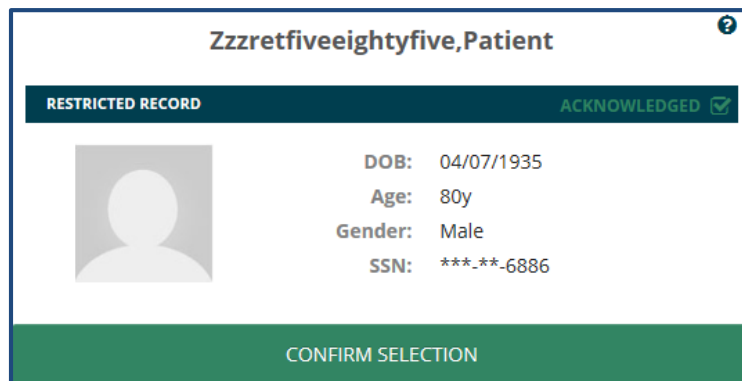

ACKNOWLEDGE RESTRICTED RECORD

The notification that appears in the dialog makes the user aware that the patient's record is restricted, and advises that if the user proceeds to "break the glass" and open the record, their activity is tracked. In addition, the user's station Security Officer will contact them for their justification in accessing the restricted patient record.

3. Read the notification dialog, and click the **ACKNOWLEDGE RESTRICTED RECORD** button.
4. The **Restricted Record Patient Detail Dialog** appears (Figure 3-8), displaying the user's acknowledgement of the restricted record.

Note: Click **ACKNOWLEDGED** ☒ to display the warning again.

Figure 3-8 Confirm Selection of Restricted Patient Record

Zzzretfiveeightyfive, Patient ?

RESTRICTED RECORD **ACKNOWLEDGED** ☒

DOB: 04/07/1935
Age: 80y
Gender: Male
SSN: ***-**-6886

CONFIRM SELECTION

5. Click the **CONFIRM SELECTION** button.
6. The patient's record displays in the Main Application Window.

Accessing a Flagged Patient Record

There are patients in the system with flagged records. The purpose of a patient record flag is to alert providers about certain patients, such as patients with disruptive, threatening, and/or violent behaviors, or research patients. The patient record flags can be national (Category I),

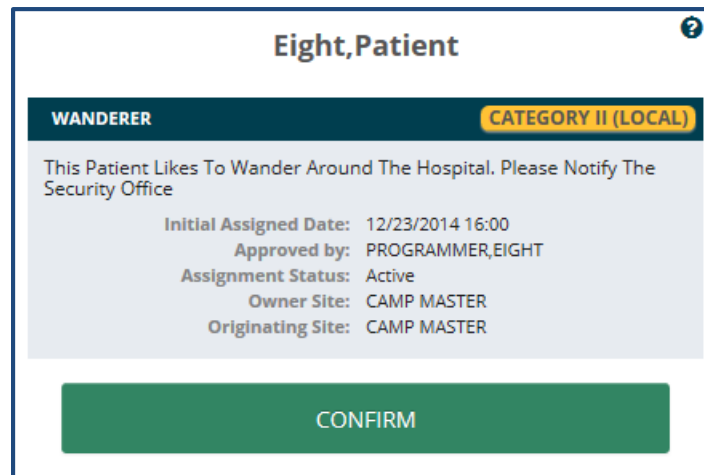

which are shared among the VA facilities, or local (Category II), which are only shared at the local site. The user must view and acknowledge the patient record flag during patient selection before accessing the patient record.

To access a **flagged patient** record:

1. Click the **name of the patient** from the search results list.
2. The Patient Detail Dialog appears.
3. Click the **CONFIRM SELECTION** button.
4. The Patient Warning Dialog appears (Figure 3-9).

Note: Some patients may have more than one patient record flag. Scroll through the patient warning dialog to read all of the notifications associated with a patient.

Figure 3-9 Confirm Selection of Flagged Patient Record

5. Read the notification dialog, and click the **CONFIRM** button.
6. The Main Application Window appears, displaying the patient record.

Main Application Window

Once the patient has been selected and confirmed, the patient record will open and users will be navigated to the Main Application Window (Figure 3-10). The Main Application Window is comprised of the eHMP Header, Global Timeline Date Filter, Workspace Manager and listing, search record field, and the user workspace. Each of these areas is described in subsequent chapters.

Figure 3-10 Main Application Window

Chapter 4: The eHMP Header

About the eHMP Header

The eHMP Header (Figure 4-1) displays abbreviated information. It lists the logged in user, allows for another patient search, presents demographics about the displayed patient, shows any postings associated with the patient, and provides the patient's care team information.

The following elements make up the eHMP Header:

- Patient Selection button
- User information dropdown
- Patient photo
- Patient demographics and inpatient/outpatient status
- Patient postings
- Care team information

Figure 4-1 The eHMP Header

Patient Selection Button

The Patient Selection button  is located in the top left corner of the eHMP Header. Select the button to navigate back to the **Patient Selection** screen to search for another patient. Click the **X** in the upper right corner of the Patient Selection screen to cancel a search, and return to the current patient record.

User Information Dropdown

The user currently logged into eHMP displays in the upper right corner of the eHMP application. As depicted in Figure 4-2, clicking on the **user's name** will result in the display of a dropdown menu with the **Sign Out** option.

Figure 4-2 Sign Out Option

Patient Photo

eHMP displays the patient image as found in VistA Imaging. The image is retrieved from the Veteran Health Identification Card (VHIC) system and displayed in the header. If an image is unavailable for that patient, then a gender neutral image displays (Figure 4-3).

Figure 4-3 Patient Photo (Example)

Patient Demographics

The selected patient is listed on the header, in the upper left corner. By default, the **patient's name, DOB, age, SSN, and Gender** display (Figure 4-4). In addition, a status of **inpatient** or **outpatient**, and the status of clinical context object workgroup (CCOW) is indicated. A green demographics bar with a chain link icon indicates that eHMP is in patient context. A red demographics bar with a broken chain link indicates that eHMP is not in patient context.

Figure 4-4 Patient Demographics

To display **expanded patient information**:

1. Click the **dropdown arrow** to open the Patient Demographics Dialog.
2. The dialog contains sections with additional patient information.
3. When the  icon is displayed, non-local demographic data is available and can be viewed by clicking on the **section** (Figure 4-5).
4. Click the dropdown **arrow** again or anywhere outside of the dialog box to exit the dialog and return to the previous view.

Patient Postings

The Postings section of the eHMP Header presents shortcuts to the following pieces of information:

- Crisis notes
- Warnings
- Allergies and Adverse Drug Reactions
- Directives
- Patient Record Flags

The Postings area of the eHMP header is depicted in Figure 4-6.

Figure 4-6 Postings Icons

The highlighted letters in the Postings area indicate that detailed information can be accessed. Clicking on a **highlighted letter** opens a dialog with detailed information (Figure 4-7). Clicking

on the **highlighted letter** again, or anywhere outside of the box, closes the dialog and returns to the previous view.

Care Team Information

Abbreviated Care Team Information for the selected patient can be seen in the eHMP Header (Figure 4-8). The header displays Care Team by site information for VistA sites, including a patient's historical data on the primary care team, primary care provider, and associated providers assigned.

Figure 4-8 Care Team Information

Primary Care: Green	Provider, Fifteen / Pcomm-resident, One	(555) 555-5858

To access **detailed Care Team information**:

1. Click the **dropdown arrow**. Detailed information displays.

Note: If the patient has been seen at other VistA sites, the user is able to view the listing for each care team by the site for which the patient has a VistA record (Figure 4-9).

2. Click the **dropdown arrow** again to close the dialog.

Chapter 5: Global Timeline Date Filter

About the Global Timeline Date Filter

The Global Timeline Date Filter controls the amount of historical data displayed throughout the application. It displays two years of patient information by default, and allows the user to modify the date range to allow for easier investigation of records.

The summary view of the Global Timeline Date Filter displays the date range selected with a graphical representation. The bars (blue denotes outpatient and green denotes inpatient) depict the number of patient activities recorded for a specific date (Figure 5-1). Hovering over the date displays a tool tip with detailed information for the specified date. The red line on the graph represents the current date.

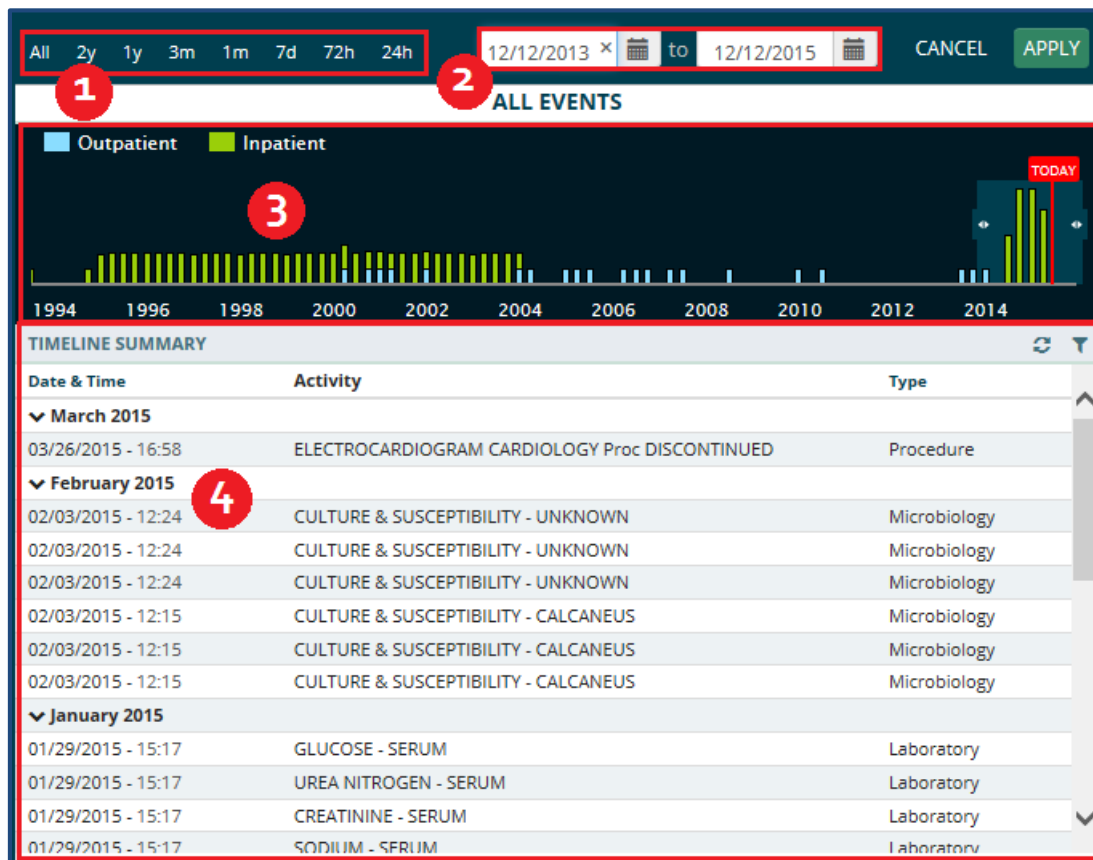

Figure 5-1 Global Timeline Date Filter

The list below describes the elements of the expanded Global Timeline Date Filter as seen in Figure 5-2:

1. Preset date ranges
2. Custom date range
3. All Events timeline graph
4. Timeline Summary

Figure 5-2 Expanded Global Timeline Date Filter

Using the Preset Date Ranges

To use **preset date ranges**:

1. Click the date range to open the **Global Timeline Date Filter**.
2. Select the desired **preset date range** (Figure 5-3). The dropdown calendar and Timeline Summary update with the selected date range.
3. Click **APPLY** to set the date range or click **CANCEL** to exit the Global Timeline Date Filter without changing the dates. The patient information for the selected date range displays.

Note: If users click **outside** of the Global Timeline Date Filter box, the box closes and the selected dates are not applied.

Figure 5-3 Preset Date Ranges

Using the Custom Date Range

To use **custom data ranges**:

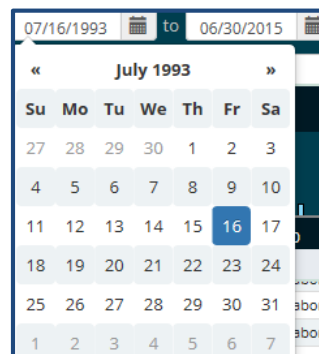

1. Click the date range to open the **Global Timeline Date Filter**.
2. Use the calendar dropdown (Figure 5-4) or enter the dates using the **MM/DD/YYYY** format to choose a custom date range.

Note: Users can only select a **from date** that is in the past and a **to date** that is the current date or a date in the future.

3. Click **APPLY** to set the date range, or click **CANCEL** to exit the Global Timeline Date Filter without changing the dates. The patient information for the selected date range displays.

Note: If users click **outside** of the Global Timeline Date Filter box, the box closes and the selected dates are not applied.

Figure 5-4 Calendar Dropdown

Using the All Events Timeline

The All Events Timeline (Figure 5-5) displays a graphical representation of events from the full patient historical record that includes both inpatient and outpatient information. It allows users to limit the data set more accurately to perform a quick analysis. The Outpatient and Inpatient titles of the graph key are clickable to display outpatient activities, inpatient activities, or a combination of both.

To use the **all events timeline**:

1. Click the date range to open the **Global Timeline Date Filter**.
2. Click and drag the **double arrows** on the left of the shaded timeline area to select the **from** date.
3. Click and drag the double arrows on the right of the shaded timeline area to select the **to** date. The dates in the calendar boxes above, as well as the Timeline Summary, populate as the user selects the date range.

- Click **APPLY** to set the date range or click **CANCEL** to exit the Global Timeline Date Filter without changing the dates. The patient information for the selected date range displays.

Note: If there is no recent data, only the red **Today** reference line displays.

Note: If users click **outside** of the Global Timeline Date Filter box, the box closes and the selected dates are not applied.

Figure 5-5 All Events Timeline

Using the Timeline Summary

As the date range for the patient record changes, the Timeline Summary refreshes to show patient activities within the selected date range. The Timeline Summary is a list view grouped by month. The groups are collapsible and can be sorted by date and time, or type. The data can also be filtered by clicking the **Filter** button (Figure 5-6).

Figure 5-6 Filter Button

12/01/2009 - 10:00	LDL CHOLESTEROL - SERUM	Laboratory

Chapter 6: Applet Features

About Applets

The applets in the eHMP application are widgets that sort patient data into segments throughout the patient record.

Most of the applets can be refreshed, filtered, maximized, and minimized (Figure 6-1) to display various levels of detail, provide different views of an applet's information, and open search capability. The applet headings are sortable, whether looking at the trend, summary, maximized or expanded applet views.

Figure 6-1 Applet Feature Icons

Refresh Button

The **Refresh** button  found on each applet in eHMP updates patient data, and should be used after entering new patient information in CPRS.

To refresh patient data:

1. After entering any new patient information in CPRS, access eHMP again.
2. Click the **Refresh** button for an applet. The new information displays.

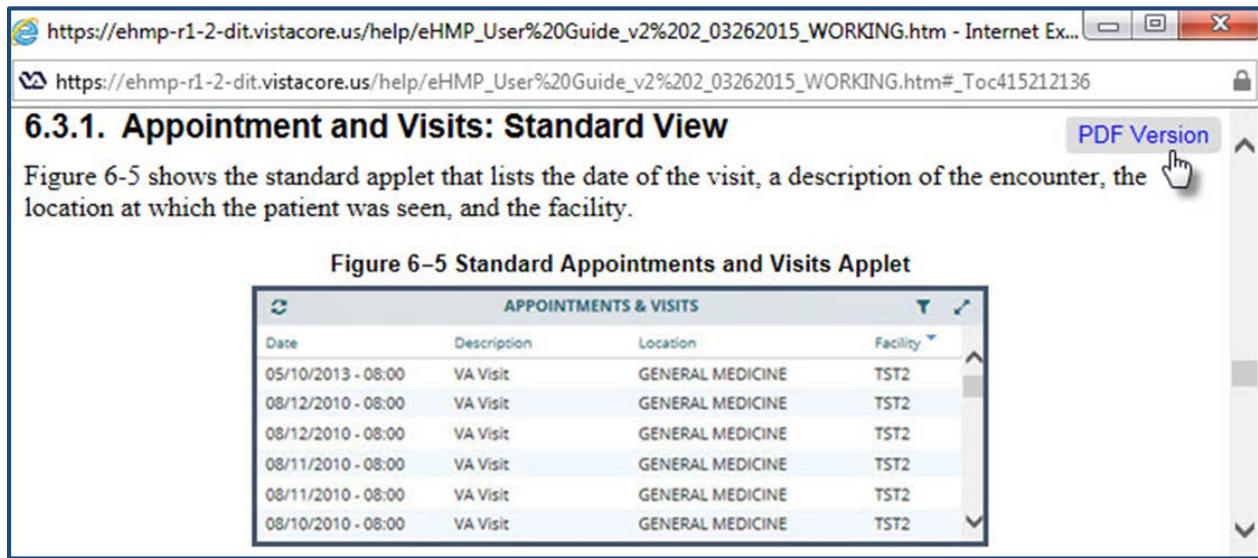

Online Help Button

The **Online Help** button  allows users to easily access context-driven, application-oriented help information.

To access Online Help:

1. Click the **Online Help** button for more information on a specific topic, and a new window displays with information on that topic.
2. Users can download a PDF version of the eHMP User Guide (Figure 6-2).

Figure 6-2 PDF Version of the eHMP User Guide

3. Close out of the Help window to return to eHMP.

Filter Button

The **Filter** button  allows users to filter data, limiting the items displayed within an applet.

To filter data for a particular applet:

1. Click the **Filter** icon to filter the data by entering key terms in the **Enter your text filter** field.
***Note:** If more than one word is used, the search results will contain all of the filter words.*
2. The applet's filtered data persists throughout the application.
3. Click the **X** next to the **Enter your text filter** field to return to the default list of items for that applet.
4. Click the **Filter** icon again to remove the filter field.

Maximize Applet Button

The **Maximize Applet** button  allows users to expand the applet. The maximized view provides more detailed information for the applet. Click the **Maximize Applet** button located in the upper right corner of the applet to maximize it.

Minimize Applet Button

When viewing an applet in the maximized view, click the **Minimize** button  to return to the previous view.

Sortable Column Headers

Most applet column headers can be selected in the trend, summary, maximized, or expanded views to sort the information in ascending or descending order.

To sort a column in an applet:

1. Click the **column name** (e.g., **Description** or **Facility**). The list sorts in ascending order.
2. Click the **column name** again and the list sorts in descending order.

Manual Tile Sort

Tiles are list items displayed when working in the trend view of an applet. Some applets provide the ability to manually sort tiles by dragging and dropping them to a new location in the list. Tiles can be sorted so that the order of display is more clinically relevant to the workspace. The sorted data within the workspace persists from session to session.

Note: *The tile sorting feature is available only for user-defined workspaces.*

Tile sorting is available in the trend view for the following applets:

- Conditions
- Lab Results
- Medications
- Vitals

To sort a tile in the Lab Results applet (example):

1. Select the **tile** to be moved (Figure 6-3). The selected tile is highlighted.

Figure 6-3 Tile Sorting

LAB RESULTS		
	Result	Last
GLUCOSE	221 mg/dL	4m
UREA NITROGEN	11 mg/dL	4m
CREATININE	1.1 mg/dL	4m

2. Drag and drop the **tile** to the desired location in the list.
3. Once the tile has been moved, the word *Manual* appears in the header (Figure 6-4).

Figure 6-4 Manual Tile Sorting

LAB RESULTS		
Lab Test	Result	Last
UREA NITROGEN	11 mg/dL	4m
CREATININE	1.1 mg/dL	4m
GLUCOSE	221 mg/dL	4m

- Repeat steps 1-4 to reorder the remaining tiles in the applet.
- To delete the manual sort and revert to the default view, click the  icon next to *Manual*.

Infobutton

Some applets provide context-sensitive medical information specific to certain concepts, such as medications, immunizations, and labs. The **Infobutton**  feature allows providers to better assess and treat patients.

The Infobutton feature is available for the following applets:

- Allergies
- Conditions
- Immunizations
- Lab Results
- Medications

To access the Infobutton within the Immunizations applet (example):

- Click a **pill** in the Immunizations applet. A set of icons display.
- Click the **Infobutton** icon (Figure 6-5).
- A new browser window opens that displays specific immunization information.
- Close the browser window to return to the previous view.

Figure 6-5 Infobutton in the Immunizations Applet

Details Form Button

The **Details Form** button  is an alternate shortcut to a detail dialog box for a selected item.

To access the detailed dialog box using the Details Form button:

1. Click the **row of the item** and a set of icons display.
2. Click the **Details Form** button. The detailed dialog box opens.
3. Click **Close** to close the dialog and return to the previous view.

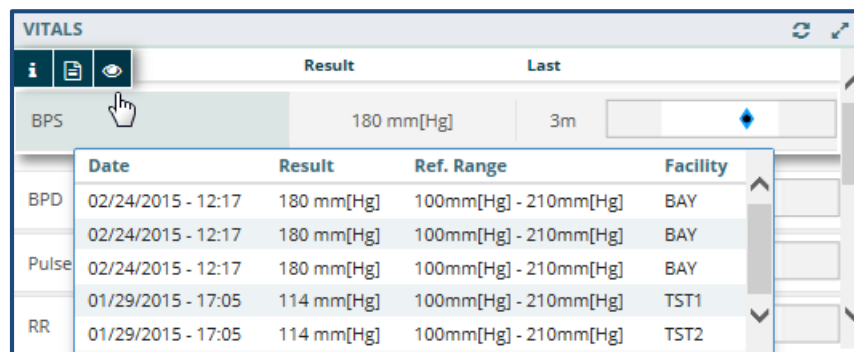

Quicklook Button

The **Quicklook** button  is a shortcut to a display of detailed information for a selected item for the trend view of an applet. The last five occurrences for the selected item are displayed in list format.

To access the Quicklook box:

1. Click the **row of the item** and a set of icons display.
2. Click the **Quicklook** button and expanded information for the selected item displays (Figure 6-6).
3. Click the **Quicklook** button again to close the expanded information.

Figure 6-6 Quicklook Button

VITALS				
		Result	Last	
BPS		180 mm[Hg]	3m

Pulse	02/24/2015 - 12:17	180 mm[Hg]	100mm[Hg] - 210mm[Hg]	BAY
	01/29/2015 - 17:05	114 mm[Hg]	100mm[Hg] - 210mm[Hg]	TST1
RR	01/29/2015 - 17:05	114 mm[Hg]	100mm[Hg] - 210mm[Hg]	TST2

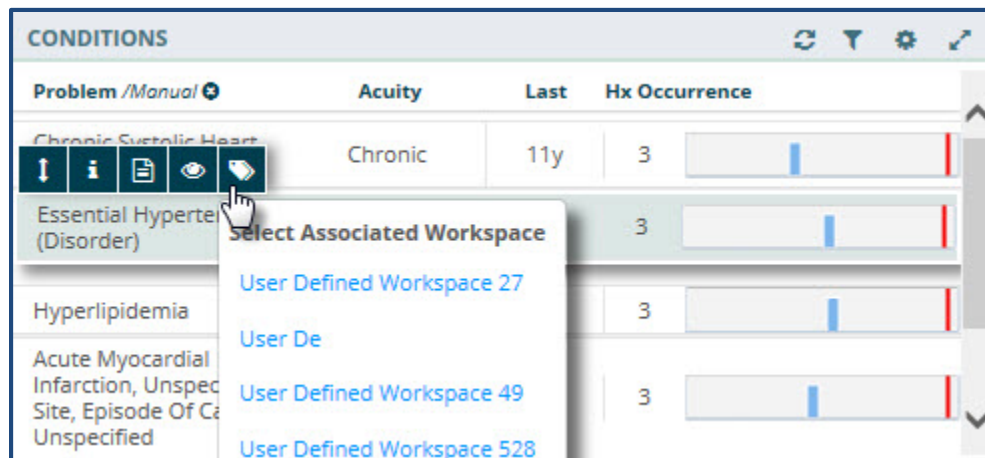

Submenu Button

The **Submenu** button  is available for the trend view of the Conditions applet. It lists the workspaces that associated with the selected condition to allow for easy navigation to specific patient data.

To access the associated workspace using the Submenu button:

1. Select a **condition** from the Conditions applet and a set of icons display.
2. Click the **Submenu** button and a list of associated workspaces for that condition display (Figure 6-7).
3. Select the desired **workspace** to open in the Main Application Window.

Figure 6-7 Clicking Submenu Button to List Associated Workspaces

Comment Indicators

When there is additional information about a list item, the trend, maximized, and expanded views of an applet display a Comment Indicator (Figure 6-8).

Figure 6-8 Comment Indicator

To display a comment:

1. Select an **item with the Comment Indicator** and a list of icons display.
2. Click the **Details Form** button and the detail dialog box displays. The comment displays at the bottom of the dialog (Figure 6-9).

Chapter 7: Applet Views

This chapter describes the different applets within eHMP and the available views for each applet. The applets are listed in alphabetical order.

Active & Recent Medications

The Active & Recent Medications applet provides users with a quick view of a patient's active and recent medications. If the patient does not have any medications for the defined date range, then they will see a message indicating that no records have been found.

Note: If a patient has an inpatient status, then only active inpatient medications and IVs display. If a patient has an outpatient status, then only active outpatient and non-VA medications display.

Active & Recent Medications: Trend View

Figure 7-1 shows the trend view that lists the active and recent medication and dosage, any refills, if there are any changes in the medication, and when the medication was last filled. It also includes all medications that have expired within the last 90 days.

When there is no refill count information available, 'NA' is displayed (usually on DoD medications). When a medication has zero refills remaining, a '0', surrounded by a red highlighted box, displays. If a medication has one refill left, a '1', surrounded by an orange highlighted box, displays. Medications that have two or more refills remaining displays the number of refills left.

The change column compares the first two medications in the item group. If the first medication dose is less than or greater than the second medication dose, the change is reflected. There is no change if they are the same dose, or if there is only one medication in the item group. 'Exp' is displayed in red for a medication that is about to expire, or has expired. 'New' is shown if the medication is relatively recent and pending. A caution symbol  displays for recent and discontinued medications.

Figure 7-1 Active & Recent Medications Applet Trend View

ACTIVE & RECENT MEDICATIONS			
Medication	Refills	Change	
Docusate Sodium 100 MG Oral Capsule Give: 100MG PO QDAY	NA	Exp	59d
gabapentin 600 MG Oral Tablet Give: 1200MG PO Q6H	NA		5m
Methadone Hydrochloride 10 MG Oral Tablet Give: 15MG PO Q12H	NA	--	5m
gabapentin 300 MG Oral Capsule Give: 300MG PO Q6H	NA	--	5m

To display more information for a medication:

1. Click on the left side of the medication tile to display a set of icons.
2. Click on the right side of the medication tile to display a quick view containing up to the last five fills for the selected medication consisting of the last update date, medication name with dosage, sig and time since last change.

Active & Recent Medications: Summary View

Figure 7-2 depicts the summary view listing the medication, and the facility where the medication was prescribed.

Figure 7-2 Active & Recent Medications Applet Summary View

All available orders for the medication display on tabs to the left under Order Hx.

1. Click a **date tab** to view detailed medication information for the selected date range.
2. Click on a **resource link** under the Links and Patient Education headers, to open a new window for more information on the selected medication.
3. Click the **Close** button, the **X** in the upper right-hand corner, or anywhere outside of the Active & Recent Medication Dialog box, to return to the applet.

Allergies

The Allergies applet provides a trend, summary, and expanded view of identified patient allergies and adverse drug reactions, with standardized coding references from all sources.

Note: It is common for a patient to have more than one instance of the same allergy listed.

Allergies: Trend View

Top allergy information for a given patient is displayed in pill format (Figure 7-5).

Figure 7-5 Allergies Applet Trend View

ALLERGIES

PENICILLIN CHOCOLATE MILK PENICILLIN CHOCOLATE Penicillins

Tetracyclines Iodine Containing Agents PENICILLIN CHOCOLATE

Allergies: Summary View

The summary view (Figure 7-6) lists the allergen name, reaction, and level of severity for each allergen. The default summary view lists the allergies sorted first by severity, then by the date the allergy was entered into the VA system.

Figure 7-6 Allergies Applet Summary View

ALLERGIES			⌂ ? ⚙ ↗
Allergen Name	Reaction	Severity	
NUTS	NAUSEA,VOMITING	Severe	
CHOCOLATE	ANXIETY; ITCHING,WATERING EYES; DROWSINESS; NAUSEA,VOMITING; DIARRHEA; RASH	Moderate	
DUST	DROWSINESS; ITCHING,WATERING EYES	Moderate	
GRASS POLLEN	ITCHING,WATERING EYES	Mild	

Allergies: Expanded View

The default expanded view lists the allergies sorted first by severity, then by the date the allergy was entered into the VA system.

The expanded view of Allergies (Figure 7-7) displays the following information in sortable columns:

- Allergen Name
- Standardized Allergen
- Reaction
- Severity
- Drug class
- Entered By
- Facility

Figure 7-7 Allergies Applet Expanded View

Allergies: Detail View

To display a detailed view of an allergy from the trend, summary, or expanded views:

1. Click an allergy to display a set of icons.
2. Click the **Details Form** button to open the Allergy Detail Dialog box (Figure 7-8).

Figure 7-8 Allergy Detail Dialog Box

The dialog box is titled "Allergen - GRASS POLLEN". It features a header bar with "Previous" and "Next" navigation buttons and a close button (X). The main content area displays "GRASS POLLEN" and "Symptoms: ITCHING, WATERING EYES". A severity level of "Mild" is indicated by a blue button. Below this, a section titled "Drug Classes:" contains a table of reaction details. At the bottom, there is a "Comments:" text area and a "Close" button.

3. Click the **Previous** and **Next** buttons to navigate through the allergies.
4. Click the **Close** button, the **X** in the upper right-hand corner, or anywhere outside of the Allergy Detail Dialog box, to return to the applet.

Appointments & Visits

The Appointments & Visits applet lists any future outpatient or specialty care appointments, and past clinic visits, for a selected patient at VA and DoD facilities.

Appointments & Visits: Summary View

Figure 7-9 displays the summary view listing the appointment dates, encounter descriptions, the locations where the patient was seen, the status of the appointment, and the facility they visited.

Figure 7-9 Appointments & Visits Applet Summary View

Conditions

The Conditions applet displays a list of conditions, with standardized coding references, that has been compiled by the providers.

Conditions: Trend View

Figure 7-18 shows the trend view that lists the problem, acuity of problem, when the problem was last reported, the history of occurrences for the patient's condition, and a graph depicting the amount of treatment received. If applicable, the conditions are grouped by their standardization codes Systemized Nomenclature of Medicine Clinical Terms (SNOMED CT).

Figure 7-18 Conditions Applet Trend View

CONDITIONS				
Problem	Acuity	Last	Hx Occurrence	
Hand Joint Pain (Finding)	Chronic	17m	1	
Shocklike Sensation From Left Elbow To Hand	Chronic	17m	1	
Bone Pain (Finding)	Chronic	17m	1	
Swelling Of Limb (Finding)	Chronic	18m	1	

Conditions: Summary View

Figure 7-19 shows the summary view that lists the description, the acuity of the patient's condition, and the status of the condition.

Encounters

The Encounters applet provides a high level view of the patients' encounters for outpatient visits, appointments, admissions, and procedures to quickly understand the types of care the patient has received.

Encounters: Trend View

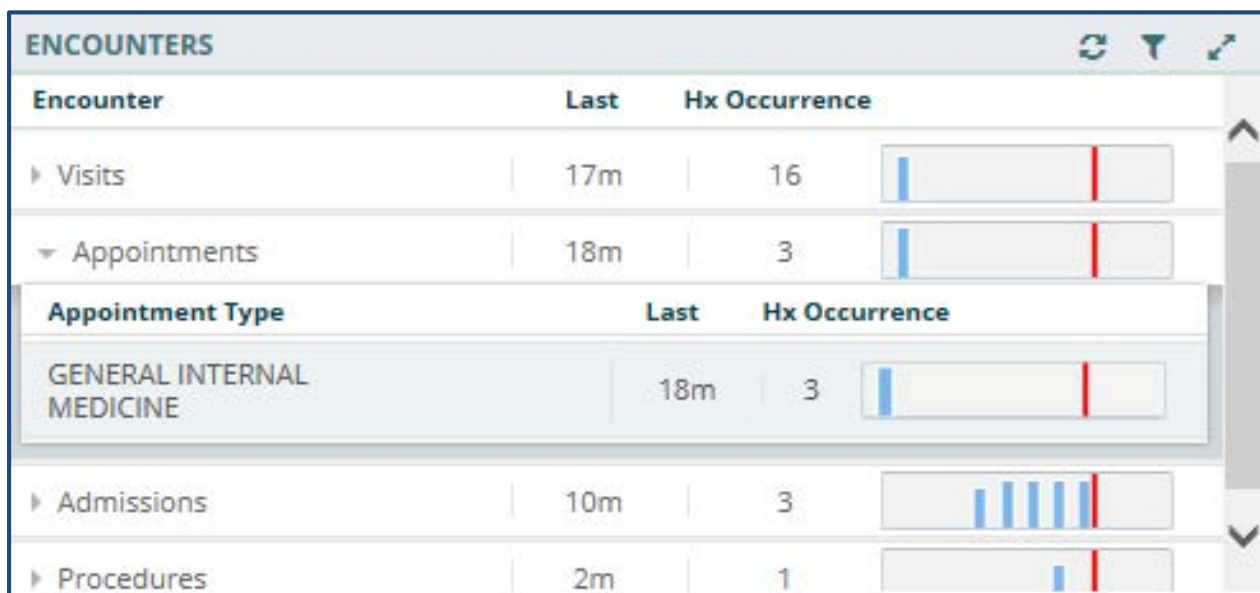

Figure 7-25 shows the trend view of the Encounters applet, with data grouped by the following encounter type: visits, appointments, admissions, and procedures. In addition, it displays when the patient was last seen for the encounter, and the history for each encounter type, with a graphical representation.

Figure 7-25 Encounters Applet Trend View

Note: Click the **dropdown arrow** to display a list of encounters for the selected group (Figure 7-26).

Immunizations

The Immunizations applet presents a list of vaccines from all sources for a given patient.

Immunizations: Trend View

Figure 7-29 displays the trend view of immunizations a patient has received. All immunizations are represented in pill format. Each pill displays the immunization name, the series number (if available), and the date the immunization was last administered.

Figure 7-29 Immunizations Applet Trend View

Detailed information for an immunization can be displayed by hovering over a pill (Figure 7-30).

Figure 7-30 Detail of an Immunization in Trend View

Immunizations: Summary View

Figure 7-31 displays the summary view that lists the vaccine name, reaction (if any), date administered, and facility.

Figure 7-31 Immunizations Applet Summary View

Lab Results

The Lab Results applet lists a patient's recorded laboratory results.

Lab Results: Trend View

Figure 7-34 shows the trend view that lists the following:

- Description
- Results (numeric data value that defaults to display pounds and Celsius where applicable, along with unit abbreviation)
- When the lab result was last documented
- Data Range Graph that includes:
 - Flags for current normal (blue diamond), abnormal low/high (yellow diamond) and critical low/high (red diamond with white star inside).
 - Previous value, indicated by a grey dot positioned in relation to the current flag, to indicate low or high value in comparison to the current value, and attached to that value with a grey line.
 - Previous value, indicated by a black dot behind the current value flag if it there has been no change between the two values.

Figure 7-34 Lab Results Applet Trend View

LAB RESULTS			
Lab Test	Result	Last	
GLUCOSE	221 mg/dL	4m	
UREA NITROGEN	11 mg/dL	4m	
CREATININE	1.1 mg/dL	4m	
SODIUM	141 meq/L	4m	

Click the data range graph to display a list of the five previous results of a given lab, including the test value, reference range, age (date and time), and facility.

Lab Results: Summary View

Figure 7-35 shows the summary view that lists the date and time taken, lab test (includes a Panel button that opens a test drawer where applicable), flag (yellow indicates abnormal results and red indicates critical), and result of the patient's lab results.

Lab Results: Detail View

To display a detailed view of a lab result from the trend, summary or expanded applet:

1. Click a **list item** and a set of icons display.
2. Click the **Details Form** button to open the **Lab Results Detail Dialog** box (Figure 7-37).
Note: If the **Panel** icon is displayed next to a list item, the **Detail Dialog** box will not open. Instead, click the item and a set of icons display. Click the **Details Form** icon, and the specific tests run within the panel display, along with the results. Select a **lab test** under the panel and then the **Details Form** icon. The **Lab Results Detail Dialog** box displays a summary list and a historic graphical representation for the selected test that can be filtered by using the date filter.
3. Click the **Next** and **Previous** buttons to navigate between lab results.
4. Click the **Close** button, the **X** in the upper right-hand corner, or anywhere outside of the Lab Results Detail Dialog box, to return to the applet.

Figure 7-37 Lab Results Detail Dialog

Medications Review

The Medications Review applet provides a single view of the medication list with additional graphical data to support analysis of the existing patient medical data in order to facilitate better clinical decisions.

Medications Review: Expanded View

The expanded view of the Medications Review applet (Figure 7-38) displays the selected patient's medication history in both list and graph formats grouped by Inpatient and Outpatient medications. When a category is selected, the group is expanded to display the list and graph of items.

Figure 7-38 shows the expanded view that lists the medication, a non-local indicator, the dosage, and the status of the medication.

Figure 7-38 Medications Review Expanded View

Medications Review: Detail View

To display a detailed view of a medication:

1. Click either the **Inpatient Meds** or **Outpatient Meds** category. The category expands to display a list of medications.
2. Click a **medication**. The **InfoButton** and **Details Form** button display.
3. Click the **Details Form** button (Figure 7-41).

No Fill History

In addition to the detailed information for the selected patient, Links and Patient Education provide access to external information and resources. This information is found on the bottom left-hand side of the Medications Detail Dialog box.

To use a resource link in the Links section of the Medications Detail Dialog box:

1. Click one of the **resources** under **Links** or **Patient Education** to launch the external resource.
2. The external resource opens in a new browser tab.
3. Click the **X** on the external resource's browser tab to close it, or click the **browser tab** labeled **VA eHMP** to return to the eHMP application without closing the external resource tab.

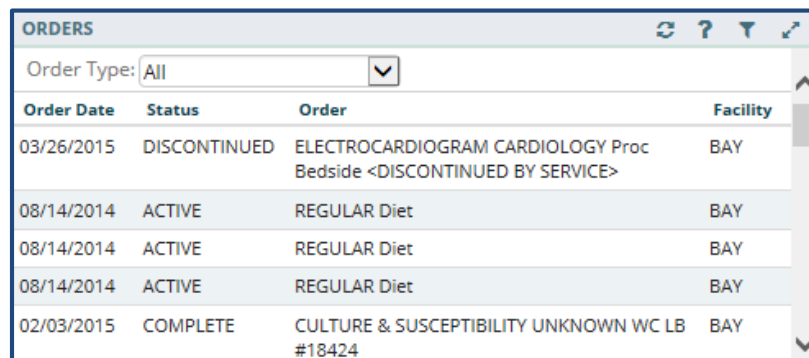

Orders

The Orders applet displays all orders for the selected patient submitted from all sites.

Orders: Summary View

Figure 7-42 shows the Orders applet summary view that lists the order date, status, order, and facility. Orders can be filtered by type using the Order Type dropdown box within the applet.

Figure 7-42 Orders Applet Summary View

Stacked Graphs

Stacked Graphs: Expanded View

The Stacked Graphs applet (Figure 7-47) is user defined, and provides graphing functionality. The applet enables users to graph different types of data to a standardized, x-axis timeline, similar to functionality currently available in CPRS.

Figure 7-47 Stacked Graphs Applet Expanded View

To add **graphs to the stacked graphs** applet:

1. Create a new workspace. *See Chapter 8: Workspace Manager.*
2. Add the **stacked graphs** applet to the workspace.
3. Open the workspace with the stacked graph applet.
4. Click the **Add a graph** button .
5. A Search field displays.
6. Enter the **name** of the desired graph type (i.e., temperature, blood pressure, etc.). The results populate as you type.
7. Select the desired **graph**.
8. The graph displays in the Stacked Graphs applet.
9. Repeat steps 4-8 to continue adding graphs to the applet.

Timeline

Timeline view provides a detailed view of a patient's visit history.

Timeline: Summary View

Figure 7-48 shows Timeline in summary view. It lists the date and time, activity, and type.

VistA Health Summaries

The VistA Health Summaries applet provides Health Summary Report functionality in eHMP. This is a re-creation of the reports available in the CPRS Reports tab under 'Health Summaries', a feature that is also provided in VistA Web, listed as 'Health Summaries', and representing each facility where the patient has a record.

A Health Summary is a clinically-oriented, structured report that extracts many kinds of data from VistA web and displays it in a standard format. The individual patient is the focus of health summaries. The data displayed covers a wide range of health-related information such as demographic data, allergies, current active medical problems, and laboratory results.

VistA Health Summaries: Summary View

Figure 7-51 shows the summary view of the VistA Health Summaries applet that groups each facility where the patient has a record. The reports are listed under the collapsible facility name, with the number of reports available indicated.

Figure 7-51 VistA Health Summaries Summary View

VISTA HEALTH SUMMARIES		
Facility	Report

Vitals

The Vitals applet displays the patient's most recently recorded vitals. The information can be viewed both numerically and in graph form.

Vitals: Trend View

Figure 7-53 shows the trend view for Vitals with the following data:

- Type – type of vital collected, i.e. blood pressure, pain, weight
- Result – data captured in relation to the vital measured
- Last – timeframe vital was last collected
- Data Range Graph, which includes:
 - A diamond represents the last (current) value
 - Blue diamond indicates a current normal value
 - Orange diamond indicates a high/low value
 - A dot represents previously recorded value
 - A dot within a diamond indicates no change between previous entries. The current value is the same as previous.
 - If a diamond is to the left of the dot, then the value of the diamond is lower than the dot
 - If a diamond is to the right of the dot, then the value of the diamond is higher than the dot

Figure 7-53 Vitals Applet Trend View

Vitals: Detail View

To display a detailed view of vitals from the trend, summary or expanded applet:

1. Click a **vital** (e.g., Blood Pressure) and a set of icons display.
2. Click the Details form icon and the **Vitals Detail Dialog** box (Figure 7-56) opens.
3. A historical, detailed view of that vital is presented in list view and graph view. The shaded area on the graph depicts the reference range, if available, for that vital.

4. Hovering over a **time on the graph** will display a tool tip with more information.
5. Click the **Close** button, the **X** in the upper right-hand corner, or anywhere outside of the Vitals Detail Dialog box, to return to the applet.

Figure 7-56 Vitals Detail Dialog

Chapter 8: Workspaces

About Workspaces

Workspaces represent an area of activity with specific applets that support that activity. There are three types of workspaces for eHMP v1.2: system-defined, condition-based, and user-defined workspaces.

System-Defined Workspaces

System-defined workspaces have been created to provide users with different views of patient information. These workspaces are predefined and cannot be edited or deleted. The Coversheet, Timeline, Overview, Meds Review, and Documents are all system-defined workspaces.

Condition-Based Workspaces

Condition-based workspaces (CBWs) are also predefined workspaces that cannot be edited or deleted. These were developed for common conditions, such as diabetes and hypertension. With a CBW, we are working on the treatment, diagnostics, and care of the patient. These workspaces expose a combination of concepts, graphing, and items to support clinical management of these conditions in an efficient and safe manner. The CBWs available for eHMP v1.2 include: depression, diabetes mellitus, hypertension, and pre-procedure.

Workspace Manager

The Workspace Manager feature in the eHMP header (Figure 8-1) allows users to add, edit, arrange and delete user-defined workspaces within the patient record.

Figure 8-1 The eHMP Header

Click the **Workspace Manager** button  to open the Workspace Manager window.

The following are the elements of the Workspace Manager (Figure 8-2):

- Add New Workspace
- Workspace Filter

- Default View
- Title
- Associated Conditions
- Description
- Author
- Duplicate
- Rearrange
- Locked/Delete
- Preview
- Customize/Launch

Figure 8-2 Workspace Manager Window

Note: A shaded row with a lock icon beside the title indicates that the workspace that cannot be edited or deleted.

Add a New Workspace

The Workspace Manager allows users to create a new, user-defined workspace that will persist from patient to patient, and session to session.

To create a user-defined workspace:

1. Click the **Add New Workspace** button , to add a user-defined workspace to the workspace manager listing.

Note: Once a workspace has been added to the Workspace Manager, users can customize the new workspace.

Workspace Filter

The Workspace Filter allows users to filter the workspaces by title or description in the Workspace Manager.

To filter through the list of workspaces:

1. Click the **Filter** button .
2. The **Filter by title or description** field displays.
3. Enter the desired **workspace title or description**.
4. The results populate as you type.
5. Click the **x** to remove the text and start a new filter.
6. Click the **filter** button again, to remove the Filter by title or description field.

Default View

The Default View icon allows users to select the workspace they want to set as their default view when they open a specific patient record. Click the **star** button  to set the desired default view.

Note: The Overview workspace is the default view until another workspace has been selected.

Workspace Title

The Workspace Title field allows users to create or edit the title for a user-defined workspace. Enter or edit a workspace title in the **title field** (Figure 8-3).

Figure 8-3 Workspace Title Field

Workspace Manager			
	Title	Assoc. Conditions	Description
☆	Coversheet	 0	
☆	User Defined Workspace 25	 0	Add description
★	Overview	 0	

Note: The shaded rows cannot be edited.

Associated Conditions

The Associated Conditions feature allows users to associate a concept (condition or problem) with a user-defined workspace. When a condition is associated to a workspace, users are able to select a condition in the Conditions applet and access a predefined workspace for treatment of that condition.

To add an associated condition to a workspace:

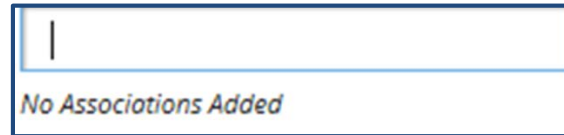

1. Click the Assoc. Conditions icon .
2. The Search Problems field displays (Figure 8-4).

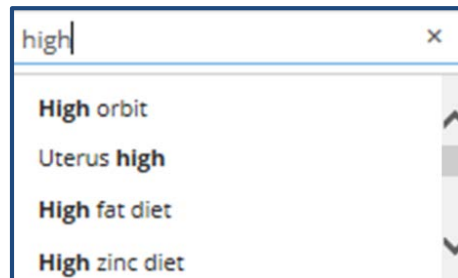

Figure 8-4 Search Problems Field

A text input field with a light blue border. Inside the field, the text "No Associations Added" is displayed in a light blue, italicized font.

3. Enter a **problem** in the field. The results populate as you type (Figure 8-5).

Figure 8-5 Problems Search Results

A dropdown menu with a light blue border. The input field at the top contains the text "high". Below the input field, a list of search results is displayed: "High orbit", "Uterus high", "High fat diet", and "High zinc diet". Each result is preceded by a small blue icon. The list is scrollable, as indicated by a vertical scrollbar on the right.

4. Select the **problem** from the list.
5. You can add another problem by entering it in the Search Problems field, or exit by clicking anywhere **outside** of the box.
6. The problem is now associated with that workspace.

Workspace Description

The Description field allows users to describe a user-defined workspace. This feature is associated with the workspace filter function. Click in the **Add description** field (Figure 8-6) to add a description of the workspace.

Note: The workspace description is optional and not required.

Figure 8-6 Workspace Add Description Field

Workspace Manager		
Assoc. Conditions	Description	Author
 0		
 0	Add description	PANORAMA USER

Note: A description cannot be added to the shaded rows.

Duplicate Workspaces

Users are able to duplicate any workspace so that they can modify the cloned workspace.

To create a copy of an existing workspace:

1. Click the **Duplicate** icon  to create a duplicated workspace. A copy of that workspace displays in the Workspace Manager list, under the duplicated workspace.

Note: See "Customize Workspaces" for guidance on customizing a duplicated workspace.

Rearrange Workspace Listings

Users are able to rearrange their workspaces so that they can order which workspaces they would like to see listed first in the Workspace Manager and the workspace drop-down listing.

To rearrange the Workspace Manager listing:

1. Open the Workspace Manager.
2. Click the **Rearrange** icon .
3. The selected row is highlighted.
4. Click and drag, or use the up and down arrow keys on the keyboard, to move the row to the desired spot.

Delete Workspaces

Users are able to delete any user-defined or duplicated workspace. Once deleted, these workspaces are no longer available.

To delete a user-defined or duplicated workspace:

1. Click the **Delete** icon . A confirmation message displays (Figure 8-7).
2. Click **Delete** to delete the workspace, or click **Cancel** to return to the Workspace Manager without deleting the workspace.

Figure 8-7 User-Defined Workspace Confirmation Message

Note: Users are not able to delete workspaces in shaded rows.

Preview Workspace

Users can preview any workspace in the Workspace Manager. The preview link displays the workspace so users can review the layout prior to launching it in the Main Application Window.

1. Click the Preview link in the Workspace Manager to open a preview of the selected workspace in a new window.

Note: The Preview functionality is not available for user-defined workspaces that have not been customized. The Preview is shaded out to indicate the link is unavailable.

2. The new displays the applet titles and views for the selected workspace.
3. Click on the X to return to the Workspace Manager.

Customize a New Workspace

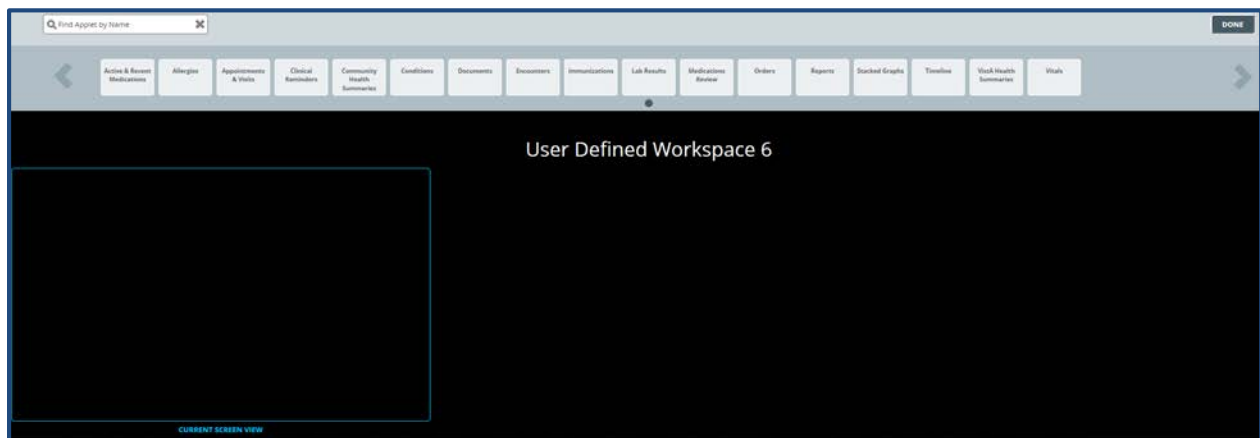

Users can customize workspaces they create to enable unique experiences within the application.

To implement the customization of a new workspace:

1. Click the **Customize** link  in the Workspace Manager to open the Workspace Editor screen.
2. The Workspace Editor screen displays with a listing of the applets in alphabetical order.
3. Scroll through the applets, or enter the applet name in the **Find Applet by Name** field above the applets.
4. Drag and drop the desired **applet** in the CURRENT SCREEN VIEW box (Figure 8-8).

Note: Any applets outside the CURRENT SCREEN VIEW box will be included in the workspace. Use the scrollbar at the bottom of the screen to view applets outside of the box when viewing the workspace in the main application window.

Figure 8-8 Current Screen View in the User Defined Workspace Window

5. **Select a View** option displays (Figure 8-9). Select the desired view for that applet.

Figure 8-9 Select a View

6. A box with the applet name and view displays in the CURRENT SCREEN VIEW box.
7. Click and drag the **applets** to move them on the screen.
8. Use the **double arrows** to modify the size of the applet (Figure 8-10).

Figure 8-10 Using Double Arrows to Modify Applet Size

9. Click the **settings** icon  to change the applet view or to delete it.
10. Repeat steps 3-9 until the workspace layout is complete.
11. Click the **DONE** button in the upper right hand corner of the screen to open the workspace in the main application window.

Note: User-defined workspaces can be edited after they have been customized.

Launch Workspaces

Once the user-defined workspace has been customized, users are able to open the workspace in the main application window using the Launch link  from the Workspace Manager. Users can edit the user-defined workspace on the main application window.

To edit the user-defined workspace from the main application window:

1. Launch the workspace from the Workspace Manager, or from the Workspace dropdown menu.
2. The workspace opens in the main application window.
3. Click and drag the **applet** to move it on the screen.
4. Click the **settings**  icon on the applet to select a different view, or to delete the applet.
5. Hover the mouse on the bottom left corner of the applet, then **click and drag** to re-size the applet.
6. Click the Workspace Editor icon  to add applets to the workspace.
7. Repeat steps 3-6 until the customization is complete.

User-Defined Applet Filters

This feature allows users to add text filters to applets in a user-defined workspace. The filtered applets will persist from workspace to workspace.

To add a text filter to an applet:

1. Open the user-defined workspace in the Main Application Window.
2. Click the **filter** icon on the applet.
3. Enter the keyword in the filter text field, and click **Add**. The applet header darkens to represent the filtered applet. Users can add as many text filters as needed.
4. Click the **X** next to the filter text to delete the keyword, or click on **Remove All** to delete all the filter text.

Note: *The applet will be filtered throughout the application. For example, if a filter was created for Lab Results in a user-defined workspace, then Lab Results will be filtered in all the workspaces where that applet is located.*

Chapter 9: Other eHMP Features

Search Record Field

The Search Record field allows the user to search within a selected patient's record for specific information.

To search the selected patient's record:

1. Enter the **specific item** (i.e., medication, document, immunization) in the Search Record field.
2. A list of suggested terms drop down from the field as you type.
3. Click a suggested **term**, or press **Enter** to run the search.
4. The results are presented in a new view in list format.

Patient Record Refresh and Status Bar

The Refresh Data button, Status Bar, and the eHMP Data Sources icon appear in the bottom right-hand corner of the eHMP application (Figure 9-1). The Refresh button provides the opportunity to refresh the selected patient's data for the most up-to-date information from all sources. The status bar displays the status of each repository that contributes to the aggregated data displayed in eHMP. Green bullets with check marks indicate that data is being synced from that source.

Figure 9-1 eHMP Status Bar

The repositories used to aggregate data:

- My Site: The user's current site
- All VA: All VA sites
- DoD: Department of Defense sites
- Communities: Community Health Partners of the VA

The eHMP Data Sources status screen (Figure 9-2) provides detailed information on the refresh status of data by source.

Figure 9-2 eHMP Data Sources

eHMP Data Sources			
Source	My Site		
			Refresh My Site
<div> <div>✓</div> <div>My Site</div> <div>New data since Current</div> </div>	Domain	Last Refresh	New Data Since

	Vitals	Current	Current
Refresh All Data			
Close			

To view the refresh status of patient data:

1. Click the **data sources** button  to open a new window with the sync statuses for all sources. The new window displays the source, when the data was last refreshed, and if there is new data since the last refresh.
2. Click the **Source title** to view the detailed status for that source. You can refresh all data, or refresh each source individually, from this window.
3. Click the **Close** button to return to the current workspace.
